Bambauer Fertilizer & Seed

The Bambauer Family
20910 Wise Rd. Jackson Center

Since 1958, Bambauer Fertilizer & Seed, Inc. has been a family owned and operated business, currently incorporating its fourth generation. With three retail locations in New Knoxville, Jackson Center and Pemberton, they are serving farmers in seven counties. On the tour, guests will experience the Dry Fertilizer Facility at the Jackson Center location. The 10,000 ton facility offers better service to Bambauer's customers with expanded storage and rail capacity as well as more efficient transfers to all Bambauer locations. A tower blend system that incorporates a state of the art High Intensity Mixer are additional features of this facility. Also at this stop, guests will enjoy facility demos, a children's corn pit, popcorn and refreshments.

Dave & Patty Mann Family Farms

19907 Botkins Rd. Jackson Center

Mann Farms was established in 1987 just outside Jackson Center, Ohio. The family operation includes Dave and Patty, their daughter Shelby and son-in-law Ethan Fite, and their son, Chris, along with several additional full-time and seasonal employees. Currently, the farm is producing corn and soybeans in several counties in northwestern Ohio. To reduce their environmental impact and grow better, the Mann's are ever increasing their use of high-tech solutions including RTK (Real Time Kinematic), autosteer in their tractors, combines and sprayers, GPS, and drones. In the process, they are protecting their soil, air and water that they depend on to create a sustainable way of life. Come and see their impressive grain storage facility and high-tech farm equipment.

K & K Dairy Inc.

Bob & Marcy Kohler
15437 Botkins Rd. Botkins

Bob and Marcy Kohler are currently operating their family farm of approximately 750 head of mostly Holstein dairy cattle. After years of milking in stanchions, the Kohler family built a double four milking parlor in 1968. Then in 2000 they built a double 12 milking parlor and are currently milking 300 cows. The Kohler family also farms 600 acres of corn, soybeans, wheat, and hay using different conservation practices such as conservation tillage. The cows are pasture-based, spending a majority of their time on grass. The heifer and bull calves are raised to maturity on their farm. At this stop you will get to see the feeding of baby calves, milking starting at 2:00PM and many jobs that are a part of life on a dairy farm. The Shelby Co. Dairy Boosters will be serving FREE ice cream.

Kah Nursery

Garden Center & Landscaping Design
17447 Pasco Montra Rd. Botkins

In 1948, George and Irene Kah established Kah Nursery with a little more than 8 acres of land, a few plants and a barn. As the business grew, they began to lease land to grow more of their own plants. In 1957, William Baughman was hired and in 1968, Bill purchased 8 acres of land which Bill and George, as partners, decided to use to plant shrubs. Over the years the partnership grew as more land was acquired and in 1984 after George Kah passed away, Bill purchased the nursery from George's wife, Irene. Kah Nursery is now comprised of nearly 50 acres, five polyhouses, two greenhouses, two shade houses, equipment barns, office, and a year round gift store. The business has shifted from managing shrub and tree growing fields to more landscaping and expanded plant growing facilities. As Kah Nursery Garden Center & Landscaping Design celebrates 70 years of service, bring the family and tour their thriving plant facilities and beautiful landscape designs.
